

U. S. Steel Begins Talks

Youngstown Signs On CIO's Terms

Pittsburgh, Nov. 9.—(AP)—The giant U. S. Steel corporation set up peace talks with the striking CIO United Steelworkers today as another big producer came to terms.

The outlook is bright for speedy end of the most costly steel strike in American history.

Shortly after disclosure that U. S. Steel is going into contract sessions tomorrow, Youngstown Sheet and Tube company signed on the union's terms.

Fourth To Agree

The Ohio firm is the fourth big steel producer to sign a strike-ending pension and social insurance agreement with the union. Bethlehem, Republic and Jones & Laughlin signed up previously.

Youngstown Sheet and Tube, ranking sixth in steel making capacity, agreed to a pension-insurance pact on the Bethlehem pattern. That calls for \$100 minimum monthly pension payments to workers aged 65 with 25 years' service. The company pays the entire cost.

The \$100 pension includes social security payments. Thus, if a worker is entitled to \$30 monthly payments from the government, the company will contribute \$70 to make the pension total \$100.

The pact also provides for a five cents an hour social insurance program. Workers and company each pay two and one-half cents to finance the plan.

Negotiations covering the 19,000 production employees took about four hours in union President Philip Murray's panelled office.

After the agreement was signed, Murray told a news conference.

"We're all happy about it," Murray said. The Youngstown firm's plants in the Youngstown and the Chicago districts will begin operations as quickly as possible. Maintenance crews were called in at once to ready the mills for a quick return to normal operations.

Wheeling Steel corporation said it submitted a peace proposal to the union. Officials expect new negotiations will be held soon to discuss the plan. Its nature was not disclosed.

U. S. Steel, usually the pacemaker in contract settlements, is the laggard this time. It spearheaded the fight against steelworkers strike demands for free pensions and insurance and now is the only holdout among the Big Four producers.

Student Carrier Pilot Takes Off With Folded Wings

Santa Monica, Calif., Nov. 9.—(AP)—With unvarying precision, student pilots wheeled their Douglas A-1 skyraiders down the taxi-way at Charleston, R.I., for simulated carrier takeoffs.

The routine was the same for each; taxi, lower the folded wings, zoom into the air. —But, what's this?

The control tower officer froze at his post when he noticed suddenly that one of the students had rolled far beyond the 300-foot mark where the planes usually become airborne.

At 250 feet the plane finally left the runway and began to climb. At 250 feet altitude it banked steeply to the left and plunged into a clump of trees.

"What happened?" queried the dazed pilot when the rescue crew freed his scratched and bruised body from the demolished aircraft.

"Nothing much," he was told. "You just forgot to unfold your wings."

Details of this feat were contained in official reports received at Douglas El Segundo (Calif.) plant from a Douglas service representative and were confirmed by the Navy.

It is the only known instance of an aircraft becoming airborne with its wings in the folded position, a necessity to save space aboard carriers.

Man Who Marked 78th Wedding Date Last January Dies

Sioux Falls, S.D., Nov. 9.—(AP)—Samuel Mercer, 56, died late yesterday. He had been a farmer.

Survivors include his wife, 85. They have observed their 78th wedding anniversary on Jan. 27.

As Associated Press checked up last winter indicated the Mercers were the second-longest married couple in the nation. Although previously the Mercers had believed they were the longest married, the Associated Press reported Mr. and Mrs. D. D. Cutsinger of Humphreys, Mo., celebrated their 78th anniversary last Feb. 9. The Mercers thereupon said they would accept second place.

Stassen Says GOP Must Be Rebuilt To Win In 1950

By the Associated Press

While Democrats viewed their victories in Tuesday's elections as a sign of greater triumphs to come in 1950, Republican leaders disagreed among themselves yesterday (Wednesday) as to the gravity of the setback suffered in populous New York State.

Harold E. Stassen warned the Republican party that it must "rebuild" to serve the people if it is to avoid defeats such as those it suffered Tuesday and in 1948.

The former Minnesota governor, who now heads the University of Pennsylvania, told members of the National Press club in Washington that the results in New York and elsewhere "reemphasized the very serious nature of our defeat in 1948."

But Governor Thomas E. Dewey of New York took a different view of Republican Senator Dulles' defeat by Democrat Herbert H. Lehman in the New York election for U. S. senator.

Dewey, who campaigned extensively for Dulles, told a news conference at Albany, N.Y., that "the result of the senatorial election is a setback and not a gain for the policies of the national administration, since Senator Dulles ran well ahead of local tickets all over the state."

Truman Extends Sympathy To Late Sen. Reed's Family

Parson, Kans., Nov. 9.—(AP)—President Truman joined political and business leaders today in extending sympathy to the family of Senator Clyde M. Reed, who died unexpectedly at his home here.

The president said he was shocked and saddened by the death last night of the 78-year-old Republican senator and publisher of the Parsons Sun.

Even as plans were made for the funeral Friday, speculation arose over a possible successor. The appointment will be made by Gov. Frank Carlson, who was expected to be in no hurry to fill the vacancy.

Carlson, frequently mentioned as a likely candidate for the senatorial nomination in the 1950 primary, expressed grief and shock at Reed's death, but he gave no hint on when he will act.

Most political observers in Topeka, the State capital, were inclined to discount the possibility the governor might resign to clear the way for his own appointment to the senate seat.

Webb Says U. S. Is Hard At Work On Jap Peace Treaty

Announce No Decision On Reich Policy

Paris, Nov. 9.—(AP)—The foreign ministers of the western powers met at length today and said progress was made on changes in "their joint policy in Germany." However, they announced no decisions.

The representatives of the United States, Britain and France decided at a seven-hour session to take up all aspects of the German question. French sources said they also put on the agenda the questions of bolstering Marshal Tito of Yugoslavia and recognition of the Chinese Communist government.

Diplomatic sources said they believed U. S. Secretary of State Dean Acheson, British Foreign Secretary Ernest Bevin and French Foreign Minister Robert Schuman had reached tentative agreements on Germany, and will draft a formal statement of the results when they meet again tomorrow. The conference is expected to end tomorrow.

A brief communiqué at the end of the meeting said only that "satisfactory progress" was made.

Acheson will visit Bonn, capital of the West German Republic, next Sunday. He will talk with U. S. High Commissioner John J. McCloy, President Theodor Heuss and Chancellor Konrad Adenauer.

McCloy and the other high commissioners are here for the conference.

The talks on Germany, it was reported, revolved about:

Economic problems of the western state.

Ending the policy of dismantling of industries for reparations.

Allowing German diplomatic representation abroad of the consular level.

Several methods of modifying the technical state of war still existing with Germany.

The conversations on ending the policy of dismantling German factories which would have war uses were described as "delicate."

McCloy has spoken out in favor of ending dismantling. His stand resulted in the present conference.

Truman's Press Secretary Given Surprise Party

Washington, Nov. 9.—(AP)—Charles G. Ross, press secretary to President Truman, was given a surprise celebration today on his 64th birthday.

One by one, White House reporters dropped in to voice trumpeted complaints about his handling of news. When Ross appeared about ready to explode, they began singing "Happy Birthday" and presenting him gifts, such as penitentiary towels.

Ross, a former newspaperman himself—with the St. Louis Post-Dispatch—had the time of his life.

His old school mate at the Independence, Mo., high school, President Truman, dropped in on the festivities.

Owner of the building is Bernard Distenfield of 3059 92nd street, Chicago.

The court provided that 17 tenants still living in the building could apply their overcharges toward future rent or collect cash within 60 days.

Among former tenants were Arthur C. Lueder, former state auditor, refunded \$6,500, and Brooks Beiter, former newspaperman now employed in the division of reports of the state department of finance, refunded \$2,500.

The 74-year-old international confidence man, who ran out on scores of women victims after winning their hearts and money, was all alone when he heard the bad news.

Mrs. Pauline Langton, 39 years old New York widow whom Engel called his "only true love" was no longer on his side.

The phony-sized romance later told newsmen he hadn't seen or heard from Mrs. Langton since last Saturday. A spokesman at the Commodore hotel, where she had been staying, said she checked out Saturday without leaving a forwarding address. The spokesman said he believed she went back to New York.

Mrs. Langton, the last of a long list of Engel's brides, stuck by him during his trial.

Two Dead Men Elected In Pa.

Philadelphia, Nov. 9.—(AP)—Two men who died several days before yesterday's election were re-elected by Pennsylvania voters.

John Miller was re-named constable of Easton's sixth ward. He died Sunday.

The offices will be filled by appointment.

Special Trains To Take Eastern Coal To Western Points

Chicago, Nov. 9.—(AP)—The Pennsylvania railroad said today that special trains made up solidly of coal-bearing cars will haul eastern coal to Chicago and beyond to points west.

The arrangement, in cooperation with the Norfolk & Western railroad, was made to help alleviate local coal shortages.

The special trains will start in Portsmouth, Ohio, an assembly point for coal freight handling, and will roll to Chicago without any switching delays.

The coal from West Virginia and Kentucky should be moving to Chicago by the end of the week, and should arrive in Chicago early next week.

Coal from mines along the Pennsylvania's route and on connecting lines also will be expedited, the railroad reported.

The action results from suspension of the soft coal strike.

Madison Times Hits Senator's Blast At Paper

Madison, Wis., Nov. 9.—(AP)—Sen. McCarthy (R-Wis.) said today he wondered whether the Madison Capital Times "is the Red mouthpiece for the Communist party in Wisconsin." His query drew an emphatic "no" from Capital Times Editor William T. Evjue.

In fact, said Evjue, "there is no daily newspaper in Wisconsin that is more hated by the communists than the Capital Times."

The junior Wisconsin senator "wondered" about the political affiliation of the Capital Times and its city editor in a letter to more than 400 daily and weekly newspaper editors in Wisconsin.

McCarthy said that on March 14, 1941, "at a time when communism was less unpopular," Evjue proclaimed that Cedric Parker, now Capital Times city editor, was "the communist leader in Madison."

The senator added that Farrell Schnering of Milwaukee and Kenneth Goff of Delavan, Wis., both had testified under oath that they had been communists and that they knew Parker as a communist.

Orders Apartment House Owner Give Tenants Refunds

Chicago, Nov. 9.—(AP)—A federal judge today ordered the owner of a Springfield, Ill., apartment house to make rent refunds totaling \$2,768.50 to 25 tenants.

Judge William J. Campbell ruled that the Ann Rutledge apartments, 615 S. Second street, had been charging hotel rates illegally. He said the building did not furnish full hotel services.

Owner of the building is Bernard Distenfield of 3059 92nd street, Chicago.

The court provided that 17 tenants still living in the building could apply their overcharges toward future rent or collect cash within 60 days.

Among former tenants were Arthur C. Lueder, former state auditor, refunded \$6,500, and Brooks Beiter, former newspaperman now employed in the division of reports of the state department of finance, refunded \$2,500.

Quirino 114,000 Votes Ahead In Philippine Race

Manila, Nov. 9.—(AP)—President Elpidio Quirino, friend of the United States, tonight grabbed a 114,000 vote lead in the Philippines presidential election. His political foes prepared to go to court.

Unofficial returns from less than one-third of the Republic's precincts gave Quirino 770,458 to 655,978 for Jose P. Laurel, puppet president under the Japanese and who was backed by anti-American forces.

Jose Avelino, Quirino political enemy, trailed with 270,183.

Chairman Eulogio Rodriguez of Laurel's Nacionalista party told the Associated Press he had strongly protested to the commission on elections the conduct of voting in five provinces dominated by Quirino.

Rodriguez prepared to appeal to the Supreme court to prevent the commission from certifying returns from the provinces, which lie in the central and southern Philippines.

The Liberal party of Quirino denied the implication of fraud in those provinces. It noted that the voting was peaceful in Occidental Negros, one of the protested provinces.

The Nacionalistas refused to count Laurel out. They said that some of the precincts on Luzon where Laurel is strongest had yet to be heard from.

To Work On Old Contract Until Nov. 30

Chicago, Nov. 9.—(AP)—John L. Lewis abruptly ended the 52 day soft coal strike today, but said it will start again in three weeks unless a contract settlement is reached.

In a sharp reversal of the traditional "no contract—no work policy," Lewis told his 380,000 striking miners to resume digging coal immediately under the old contract that expired July 1.

Some mines began partial operations at once. Many others planned to reopen the mines to their mid-night crews.

The job of relieving a coal shortage that has hit households and small consumers a hard blow in many parts of the country is expected to be going at a good pace by tomorrow.

Some May Work 6 Days
Some mines have offered to operate on a six day week, with time and a half pay for the sixth day.

The Interstate Commerce Commission said it is keeping in effect, at least for the present, its order that brought a 25 per cent cut in coal burning train passenger service, made plans to recall furloughed workers and get the coal cars moving again. The Norfolk and Western railroad shelved plans to pull off 23 passenger trains Friday. The New York Central, meanwhile, said none of its cancelled passenger trains will be restored immediately because the coal crisis is merely deferred.

There were some clouded spots in the immediate future, however. Union sources said the miners expect a continuation of royalty payments required under the old contract. Some southern operators had declined to make such payments after the old contract expired.

May Not Be Willing
In Washington, Joseph Moody, president of the Southern Coal Producers association, told a reporter he wasn't so sure some of his operators would be willing to resume the 20 cents a ton payment.

With dramatic suddenness that caught government mediators and many industry representatives by surprise, Lewis summoned newsmen to announce that a strike truce had been declared until midnight Nov. 30.

He said it was "an act of good faith, designed to contribute to public convenience."

Then he blasted the coal operators as "brutal and arrogant" in "withholding their assent" to a new contract. He said they have "shamed the precepts of morality by casting aside every restraint to their sordid and mercenary appetite."

His union, Lewis continued, "explores such public inconvenience" as resulted from the work stoppage.

Says Bolivian May Not Have Heard Warning In Crash

Washington, Nov. 9.—(AP)—A young airport traffic controller conceded at a federal inquiry today the possibility of using the wrong radio channel when he tried to prevent an air collision which cost 55 lives.

The testimony came from Glenn D. Tigner, 21, one of several operators in the Washington National airport control tower Nov. 1 when a war surplus P-38 fighter ripped through an Eastern Airlines DC-4, killing all aboard, Erick Rios Brindoux, Bolivian civil aviation director and pilot of the P-38, survived the wild plunge into the Potomac river, but was seriously injured.

WE SEEM TO BE STUCK WITH
DEFICIT FINANCING FOR A WHILE

The federal government is expected by President Truman to pile up a \$5,500,000,000 deficit in the fiscal year ending next June 30. Other forecasters think the final figure may be closer to \$7,000,000,000.

Whichever total proves right, it will be the biggest deficit ever recorded in the United States during a prosperous peacetime. Many Americans may be somewhat shocked to realize that even when times are good and there is no war, the government cannot operate on anything near a pay-as-you-go basis.

In January Mr. Truman predicted the deficit for the current fiscal year would come to just \$900,000,000. The President's latest report blames the changed outlook largely on an anticipated drop in tax revenues of \$3,000,000,000. But spending also will be higher than planned—\$1,600,000,000.

Mr. Truman's budget review says the expected decline in revenues will be an outgrowth of moderate decreases in prices, corporate profits and money incomes that accompanied the 1949 recession.

The added expenses are ascribed mainly to unlooked-for increases in veterans' benefits, government purchases of housing mortgages and farm price supports. It is estimated the farm price props will now take \$1,400,000,000 this fiscal year, compared to an original guess of only \$600,000,000. Thus this item accounts for \$800,000,000—or half—the expected higher outlay by government.

Economic crystal gazers who believe the President's deficit forecast too conservative note that the Bureau of Agricultural Economics sees a further drop in farm income in 1950. This prospect coupled with the new broadened price support program just enacted is thought likely to boost the cost of supports to at least \$2,000,000,000 for the year.

Furthermore, some prophets foresee a sharper general falling off in tax revenues than the President's experts do. They think decline in income will be widespread. Hence their prediction of a deficit of around \$7,000,000,000.

This is not a cheerful picture, but one aspect of it lightens the gloom. These are not normal times of peace. This country is spending about \$25,000,000,000 for foreign economic and military aid and its own military programs. Without the threat of a hostile Russia much of this outlay might be unnecessary.

Yet there is no help for it—the money must be paid out if we are to continue our striving for a stable, peaceful world.

The average American might think that in the light of these colossal burdens the Administration and Congress would strain every effort to save money on other fronts. But economy drives in Washington this year were a dismal failure. The new farm price bill emphasized that there is little disposition in the capital toward cutting down. The reverse seems to be true.

The President says he sees no way out but higher taxes. But 1950 is an election year and few people believe Congress would vote heavier levies at such a time.

Barring a surprising switch to strict economy, there apparently is no hope of getting out from under deficit financing until our foreign and military expenditures begin to taper off, or unless U. S. national income soars to unimagined heights.

EMPORIUM

HEALTH AND SAFETY IN
OUR AMERICAN DEMOCRACY

(Editor's Note—This is the fourth in a series of articles by Jacksonville men and women in recognition of American Education Week.)

By DR. GEORGE L. DRENNAN
President of Morgan Co. Medical Society

DR. GEORGE L. DRENNAN

Whenever stock is taken of achievements designed to increase the chances of a good life and to improve the conditions of living, the people turn to examine the status of public and private action in behalf of children and to assess the extent and quality of care provided. This is natural because we recognize that the good life for mankind and world peace lies in the health and vigor of children, in their capacity to learn, in their ability to grow as thinking, reasoning human beings, and to develop from infancy through childhood and youth until they reach adulthood as fully mature persons, secure in their ability to take their places as citizens and as parents.

School health activities in this country have without doubt contributed immensely to public welfare, and in recent years a great deal more attention is being given to extending such activities much further. The suggestions of children in our school system offer obvious and great opportunities for public health activities. In general, school health activities deal with: (1) the prevention of cross infection, made greater by the school system itself, and the control of other health hazards inherent in the school system; (2) education of child and parent in health problems; (3) instruction in rules of safety or safe living; (4) the actual care of the health of the individual child.

Public Health Activities
There is no question as to the need of public health activities to prevent the hazards inherent in the aggregations of children in the schools, and the opportunities for education of parent and child in health problems are obvious.

Epidemics of diphtheria, typhoid fever and small pox are within the memories of many citizens of Jacksonville. The part played in the spread of these diseases by school children is known to all. Epidemics of food poisoning, from eating contaminated foods are too frequently occurring. That the prevention of diseases and their spread can be accomplished by rigid application of the proved principles of preventative medicine, has been demonstrated. Food poisoning can be made rare occurrences by rigid application of accepted rules for food handling.

Since accidents are the chief cause of death of children above the age of one year, it is commendable that our schools are engaged in this phase of death. Instruction in automobile driving, accident prevention, fire drills, safety patrols and all of the other activities for safe living are evidence of this interest.

It has been shown that growing individuals need more rest than those who have attained full stature. The newborn baby requires twenty or more hours rest a day; the preschool child takes at least one rest period besides ten or more hours at school.

The overall goal toward which we are working is to assure every child the experiences in life that will result in adulthood, fully mature, healthy in body and mind, emotionally secure, able to give more than is asked for, to face success and frustrations with equanimity, to be self-reliant, to cooperate with his fellows, to take his place in a democratic society as a thoughtful, responsible citizen concerned with the common good, and to live harmoniously in a total changing environment.

Noted Throat Specialists Report on 30-Day Test of Camel smokers...

NOT ONE SINGLE CASE OF THROAT IRRITATION due to smoking CAMELS!

"Camels agree with my throat!"

"The 30-Day Test was the first time I'd ever given Camels a real trial. Now I know how mild a cigarette can be! Camels for me!" H. Southwell, Jr., lawyer.

"The 30-Day Test changed my idea about cigarette mildness. I'm smoking the brand that agrees with my throat—Camel!" Rita Tennant, secretary.

"The day I started was the day I began to get more fun out of smoking. That good-tasting flavor won me to Camels completely!" Mrs. Edna Wright, housewife.

College student Anne Hogan: "My doctor's report came as no surprise to me. My throat kept telling me 'Camels are so mild—so cool and mild!'"

"Yes, I tested Camels for 30 days. I have real smoking proof that Camels agree with my throat!" William S. Davis, Jr., travel representative.

Meet Mr. and Mrs. Richard Cole of Fresh Meadows, New York, who made the test. Both found Camels the mildest cigarette they ever smoked.

ELAINE BASSETT, television stylist of New York City, reports on her 30-Day Test—

LONG BEFORE I GOT THE DOCTOR'S REPORT, I KNEW CAMELS AGREED WITH MY THROAT. THEY'RE THE MILDTEST CIGARETTE I EVER SMOKED! BEST-TASTING, TOO!

MISS BASSETT is one of hundreds, coast to coast, who made the 30-Day Test of Camel Mildness under the observation of noted throat specialists. She smoked Camels for 30 days. Her throat specialist's report, after careful weekly examinations—NO SIGN OF IRRITATION due to smoking CAMELS!

Yes, make the test yourself. Smoke Camels, and only Camels, for the next 30 days. See if it doesn't add up to more smoking enjoyment than you've ever known before. Compare Camels in your "T-Zone" (T for taste, T for throat). See if you don't find Camels the mildest, best-tasting cigarette you ever smoked.

Ways to Save

If you were a native of the Tuamotu Archipelago your "wealth" would consist of long tubes of bamboo filled with copra oil, which you would store in the back of your hut. A native with but little living space remaining in a large hut is an important person because it means he has much copra oil saved.

CAT AND DOG FIGHT PROVES COSTLY

Anaconda, Mont. — (AP) — F. C. Brown of Avon, Mont., was driving a loaded furniture van when his dog and cat got into a scrap on the seat beside him. The truck careened across the street and struck a parked automobile. It bounced off and smashed through the north wall of the Matt J. Kelly coal and storage warehouse, colliding with a conveyor. Finally, it rammed through the south wall before Brown could stop it.

He came out without a scratch. So did the dog and cat, except for the damages they inflicted on each other.

Clam Chowder Can Be Dynamite!

If Smiley Roberts is a friend of yours, like he is mine, and if you want to keep his friendship, like I do, don't ever let him hear you say that good clam chowder can be made without cream.

In New England, where Smiley comes from, friendships have been broken over tomatoes versus cream in clam chowder. Experts say that south of Boston the tomato reigns supreme, but north of Boston it's cream—or else!

From where I sit, whether it should have cream or tomatoes is simply a matter of taste. This is

Film Library To Be Established By County Schools

Because of the difficulty of securing teaching films when they are needed, the representatives of the four unit school systems in the county have proposed a plan for a county film library.

The library will be established at the office of John C. Deem, county superintendent of schools, who will assume the duties of care and distribution.

The cost of the program will be \$1,200 for rental of 100 films for one year. According to terms with the company, the rental fee may be applied towards the purchase price, the films being paid for by four years rental. There will be approximately \$200 cost of establishing the film library and purchase of needed supplies, such as film rewriter, shipping cases, etc.

Schools will participate on an annual basis. In order to distribute the cost equally among large and small schools, it was agreed by the committee that there should be a flat entry fee of \$150 for unit districts. In addition to the flat entry fee, each school is to contribute 20¢ per pupil enrolled. According to the present figures, in the four unit districts this will raise approximately \$1,437.60.

It is expected that many of the smaller districts will want to come into the plan. The committee has decided that these smaller districts who do not operate a high school, shall be admitted into the plan for an entry fee of \$100, plus 20¢ per pupil enrolled. This figure was established by the committee because, on the average two-thirds of the enrollment of children is in the elementary school.

The cost to the Jacksonville district will be approximately \$600 per year.

Stories Of Early Life In Kentucky Told To Optimists

Stories of his boyhood in the Cumberland mountain section of Kentucky were related by Rev. William J. Boston of this city in a talk to the Optimist club Tuesday evening at Hamilton's cafe.

Rev. Boston was 11 years old when his family moved from near Monticello, Ky., to Morgan county, but he remembers many songs and stories that grew out of mountain folklore.

The speaker said it is often amusing to him to hear modern radio comedians tell stories which he heard from his uncle in Kentucky, more than 40 years ago.

Rev. Boston sang several folk songs, with banjo accompaniment by Edward Greenwood. The minister said when he was a boy the people of his home community made their own musical instruments, consisting mostly of violins and banjos. He took up the art as a hobby, and has constructed several banjos.

Mrs. R. L. Willard appeared before the club on behalf of Rev. James Caldwell Chapter, D.A.R., which is faced by the problem of major repairs on the Gov. Joseph Duncan home if it is to be preserved further after standing more than 100 years.

Mrs. Willard asked the club to appoint a member to serve on an advisory committee to study the situation.

Reports were given by several Optimist committees on plans for the opera, Carmen, to be presented Nov. 21 at the Illinois School for the Deaf auditorium. The president, Rev. C. Frank Janssen, presided.

Reduced—New fall dresses, crepes, taffeta, satin and satin and wool combinations, sizes 9 to 15, values to \$19.95 now \$5—\$7—\$10.

Aged Prophet Forecasts Own Death

Melbourne, Australia—(AP)—Three weeks before he died, Abmar Singh forecast the exact date (September 2, 1949) of his death. It was the last of a number of accurate prophecies he made during his life. He said his age was 115 years.

Singh accurately forecast the appearance, late in 1947, of a comet previously unknown to science. He also forecast sunspots and a cyclone wave; there was a hurricane instead. But he missed on a number of prophecies. One of his prophecies still awaiting proof is that the world will end in spectacular fashion in the year 2,000, A. D.

THE DOCTOR SAYS

Some Backache Cases Need X-Ray To Locate Cause

By Edwin P. Jordan, M. D.
Written For NEA Service

The lower back is a vulnerable part of the anatomy. Not only do things happen to the bony structures of the back itself, but also there are many important parts lying near it which also can result in the common complaint of backache.

There is always a problem in diagnosis for anyone who complains of a backache. Sometimes the cause may be obvious, but often it is extremely difficult to trace. It is impossible to name all of the possible causes for backache, but mentioning a few of them will give an idea of how complicated the problem is of identifying the cause.

Sprains, dislocations, fractures, bruises, or a rupture of the disk or cartilage which separates the bones of the spine may all produce backache. Bad posture can account for pain in the back. One leg shorter than the other, flat feet, and bad seating, belong in this group. Sometimes backache may come from a defective structure which was present at birth but which did not produce symptoms or pain for many years.

Need Examination

Until the cause of a backache has been found, the proper treatment cannot be started. Physical examination and examination of the nerves

is necessary. X-ray examination of the spine is essential to determine the cause in most cases. The angle at which the film is taken must be directed by an expert so that it will show exactly what is necessary.

Heat, massage, exercise, support by means of corsets or braces and bandages, rest under favorable circumstances, and similar measures are all part of the treatment for certain kinds of backache. If the trouble is in a joint, an operation may be necessary to fuse the bone. Where there is a ruptured disk between the spinal bones or a tumor, surgery may be the only way to bring relief.

Note: Dr. Jordan is unable to answer individual questions from readers. However, each day he will answer one of the most frequently asked questions in his columns.

THE DOCTOR ASKERS

By Edwin P. Jordan, M. D.

Question: Is a blood pressure of 160 dangerously high for a man aged 28?

Answer: It is too high, but one would want to know whether it was constantly 160 or only occasionally so. Many people have a high blood pressure when they are excited by an examination which is normal or nearly so the rest of the time.

Isn't America A Wonderful Country!

All over the world today there are people teaching bitterness and hate.

Here in America we have learned to live together in friendship.

For us here at A&P, it has been a wonderful and thrilling experience to get from those with whom we compete day after day such astounding evidence of friendship and respect.

The things that have happened since the anti-trust lawyers from Washington brought suit to destroy A&P have amazed us.

While we sincerely believed that we had earned the friendship of millions of consumers for whom we have provided better food at lower prices, and the friendship of millions of farm families for whom we have provided a better market for their produce, we were not prepared for the avalanche of offers of support.

But most of all, we have to confess that we had underestimated

the fine sportsmanship of many of our competitors all over the country.

Can anyone believe that these competitors would rush to our defense if, as the anti-trust lawyers allege, we had been trying to put them out of business?

We and they have fought hard for business.

There are nearly 350,000 individual grocers competing with us. They have a larger share of the nation's grocery business today than they had ten years ago or twenty years ago.

Many of them do as good a job as we do, and they make it plenty tough for us.

Now, day after day, these same competitors are letting us know that they are in our corner.

All we can say is, thank you from the bottom of our hearts.

Isn't America A Wonderful Country!

Who hollered for Uncle?

Who wants him to break up A&P?

COULD IT BE INDEPENDENT GROCERS? Doesn't seem likely. In ten years America's independent storekeepers almost tripled their business. In 1938 they did just under \$1/2 billion dollars worth of food business. Last year the independent storekeepers handled over 15 billion dollars worth of food.

WHOLESALE GROCERS? Hardly. For many of them are directly or indirectly engaged in or supporting some form of voluntary or cooperative chain to match chain economies.

THE EMPLOYEES? That would be funny—except that some folks probably believe it. Actually, less than 25 years ago many food chain stores could have paid all expenses—rent, heat, light, wages, etc.—out of the money a store manager alone gets paid now. And the store manager of 25 years ago would have been happy to get what a clerk gets today.

PRODUCERS? Well, take farmers. Certainly part of their prosperity must be attributed to the markets that big chains create for them. The big chains buy the entire pack of many a canner. Those canneries pack the farmers' crops. What would the farmer do with his highly perishable crop if the food chains were eliminated as big volume buyers?

COMPETING CHAINS, MAYBE? No. Practically every chain in the grocery business had more sales last year than the year before. One chain that we know a lot about increased its food business 21% last year and is up 19% in the first eight months of this year.

THEN IT CERTAINLY MUST BE THE PEOPLE! Like fun. If the people hated food chain stores, would they have spent 9 1/2 billion dollars in them last year? Folks like the low prices and high standards of chains—and the better the chains are run, the better folks like them.

Does This Sound as Though We Need Help? Thorofare Super Markets came into existence 10 years ago. The food chains Thorofare replaced were doing about three million dollars worth of business a year. Housewives liked our policies well enough to boost their purchases in our 90 stores to about 30 million dollars a year.

We call that a vote of confidence. And we're going to keep right on proving that as long as we stick to good brands and better-than-average selections at rock-bottom prices, we can compete with anybody in the business. And keep right on growing, too!

We don't believe any chain will be punished for being efficient, or for pleasing housewives so well that it is forced to grow.

We, too, believe that it is a storekeeper's duty to bring the public the best food at the lowest possible prices, and hope to see the chain store way of doing business vindicated.

And as long as the producers, the employees, the customers, the wholesale grocers, the independents and the competing chains thrive so well, we will continue to think it's a good way to do business.

We Don't Want the A&P Put Out of Business

The owner of the undersigned store is an independent merchant in this community. We run our own store, set our own prices, maintain our own policy. We consider the Great Atlantic & Pacific Tea Co. as a chain store. Because they are a chain they give us stiff competition. The competition offered by the A&P keeps us on our toes.

The Department of Justice has brought a suit against the A&P claiming that the A&P is a monopoly.

Whether it is or not we are in no position to judge.

What we do know is that the A&P doesn't do all of the grocery business in this area. We are here and ready to serve local customers.

WE DON'T WANT TO SEE THE A&P PUT OUT OF BUSINESS. The A&P is keeping food prices down. We in turn keep our prices down; and that helps us to sell more goods.

KUGLER'S SUPER FOOD MARKET
PHILADELPHIA, PA.

I Welcome A&P Competition BECAUSE

• • • • • like myself, many hundreds of independent grocers got their start with the TEA COMPANY.

• • • • • The great A&P is not detrimental to the progress of the grocery business. On the contrary, A&P has always been beneficial to any open-minded businessman who believes in FREE ENTERPRISE. Founded on the principle of FAIR PLAY and FAIR PRICES, A&P developed from a humble start to its present commanding position in the field of retail merchandising.

• • • • • My experience as a former employee of the TEA COMPANY has served me well. I attribute my success to the ideas and methods tried, tested and proven by the A&P stores—at a great cost.

• • • • • A&P upholds the rights and privileges of a good worker. I know this from personal experience. A&P is ever on the lookout to promote sincere and ambitious employees to trustworthy and important positions and has never crossed the efforts of any employee to enter into business for himself. A&P helped me to start in business. . . . IS THAT AN ACT OF A COMPANY MONOPOLIZING THE GROCERY BUSINESS? NO!

A&P taught me to serve the public BETTER—MORE ECONOMICAL and MORE EFFICIENT, thanks to the start given me by B. F. VINSON.

• • • • • During the depression of the thirties, A&P paid higher wages than any other chain. A&P has striven to keep up the standard of living in this country. I shudder to think what would happen to its 110,000 employees if it was forced out of business.

• • • • • I am not afraid of A&P competition—I welcome it. It's democratic—it's the American Way.

We Agree With A&P

Yes, we want our A&P competitors to stay in business on their present scale because we know what it would mean to the American people without them.

We are only one store and are striving to serve our community with good food at low prices, but the A&P is a nationwide organization serving the American people everywhere with good food at low prices.

Destroying the A&P would mean eliminating competition nationally in the food field which every poor man knows consumes the major portion of his salary.

We congratulate the A&P for a job well done. Keep up the fight.

We welcome any fair competition which helps bring lower food prices to the consumer.

A COMPETITOR'S OPINION of The Great Atlantic & Pacific Tea Co.

The self-styled "trust busters" of the government recently made headlines as a result of a move to destroy the A&P.

Frankly, we don't like it. A&P is charged with having control of SOME of the production and processing ends of the food business. As a result, they can offer foods at low prices.

So What... And if monopoly of the food business is charged, that sure hands us a laff. We... at P.M. are growing like wildfire. Seems like we're able to sell better foods at better prices.

Your increasing patronage of our stores is positive proof that A&P has no monopoly on the food business. Let's get down to good old American horse sense. A&P is doing a good job of serving the people of this country. They're no bogey men. We are for them 100% in this controversy.

The Anti-Trust Suit Against The Atlantic & Pacific Tea Co.

This suit is another threat against our great American system of free enterprise. The A&P Co. has always been clean, above board competition and any successful independent merchant, if he is honest, will admit that they have taught him a great many things regarding merchandising, reducing overhead, better buying, etc., thus lowering food costs for the great American Public.

New York Stock Market

New York, Nov. 9.—(P)—Strong demand for General Motors common stock contrasted with downward tendencies elsewhere in the market today.

Favorable labor news evidently had little effect on trading sentiment. Losses were mostly fractional and a good handful of issues clung to modest gains.

Trading progressively slowed although turnover hit a rate of around 1,500,000 shares for the full session. Railway issues moved sluggishly in the bond market.

CHICAGO CORN, OATS, STRONG

Chicago, Nov. 9.—(P)—Highly mixed price trend developed on the board of trade today while dealers awaited the agriculture department's crop report.

Feature of the session was strength in corn and oats. Deferred corn contracts and December and may oats made new seasonal highs. Part of the buying in corn came from export interests. Sales were made overnight to Ireland and Austria.

In contrast with feed grains, wheat, soybeans and rye weakened. December rye fell to a new seasonal low as an additional 324,000 bushels of Canadian rye arrived here. Lack of aggressive demand for soybean oil and meal brought pressure on bean futures.

Receipts were: wheat 6 cars, corn 258, oats 15, rye none, barley 19, soybeans 80.

Wheat closed 1 lower to 2 higher. December \$1.20 1/2-1, oats were 1 1/2 higher. December 74 1/2, rye was 1 1/2 higher. December \$1.34 1/2, soybeans were 1 1/2 lower. November \$2.21 1/2-2 1/2, and hard was 5 1/2 to 10 cents a hundred pounds lower. November \$9.55.

Markets At A Glance

New York, Nov. 9.—(P)—Mixed; General Motors strong.

Bonds—Higher; some rails in demand.

Cotton—Steady; mill demand.

Chicago:

Wheat—Closed steady on late rally; weak early.

Corn—Firm; export sales increase.

Oats—Firm with corn.

Soybeans—Easy; slow demand for oil and meal.

Hogs—25 to 40 cents lower; top \$16.56.

Cattle—Mostly steady to 50 cents higher.

CHICAGO LIVESTOCK MARKET REPORT

Chicago, Nov. 9.—(P)—Hogs eased 25 to 40 cents a hundred pounds today while cattle were mostly steady to 50 cents higher. Both classes found country supplies cut back 2,000 head below trade expectations. Sheep were steady to 50 cents lower, lambs taking the cut.

Most barrows and gilts grading good and choice sold within a narrow \$16 to \$16.35 range, a top of \$16.50 being paid only sparingly. This was the lowest since price controls were in effect in October, 1946. Sows were chiefly \$15.50 to \$16, heaviest drifting as low as \$14.50.

Choice steers brought \$33 to \$39, the day's top, and good to low-choice kinds were \$27 to \$32.50. Good to choice heifers fetched \$25.50 to \$31.50. Sausage bulls, which were weak to 25 cents lower, out of line with the rest of the cattle trend, topped at \$19. Vealers continued at \$28 and below.

Good and choice wool, lambs brought \$23 to \$23.50, their top. Horn kinds topped at \$23, choice yearlings at \$21, and slaughter ewes generally at \$11. Choice hand-picked native ewes managed \$12 to \$13 paid by eastern shippers.

Receipts on sale included an estimated 10,000 hogs, 8,000 cattle, 500 calves, and 2,500 sheep.

The CAMEO
By Virginia Teale

THE STORY: Hagar Blair and

Andrey Yakov are both trying to

buy a valuable cameo which both

Neil O'Neill and Tom Falter claim

in own. All are residents of

Ulenora, a western art colony.

The cameo was last seen in the

hands of Arnold Pender, who said

to own it. Stephanie Smith, who

works for Hagar, says the cameo

means a great deal to her and

Hagar, with kindness in her old

heart, has promised to buy it. As

she gets into her car to go to see

the cameo box in her machine. The

box is open and empty.

IX

THE old iron-studded door of

Bob's place was a familiar and

welcome sight to the bibulous of

Ulenora. Bob claimed he had stolo-

in it from a Spanish monastery in

the Pyrenees during his voluntary

military service in Spain's civil

war. The story of how he got it

out of the Pyrenees and into Cali-

fornia was a tale which became

more astounding and dramatic

with each retelling. He had lost

his left arm in that adventure.

Bob was a writer of pseudo-

scientific fiction during his leisure

hours and, though his volume of

literary sales was small, his fan-

tastic imagination was a source of

amusement to friend and foe and

editor.

Following Neil O'Neill's exam-

ple, Andrey Yakov perched on a

stool and leaned his elbows on a

strip of illuminated plate glass.

Tropical fish swam lazily under-

neath it among coral and aquatic

plants.

The man who proved to be the

fabulous Bob Knox bowed to

Yakov and then turned his gold-

glinted smile on Neil.

"You're just in time, lovely lady.

I think Papa wants to go home."

He gestured toward the farthest

booth. "Behold the weary reveler!"

Neil and Yakov turned and

looked. Tom's crisp white hair

showed up clearly against the ta-

ble top. One arm hung at his side

and the other rested on the board.

"Kicked by a Moscow Mule."

Bob observed cheerily. "That's

what ginger beer and vodka will

do."

Neil slid from her stool and

walked over to the booth.

"Ginger beer and vodka?" asked

Yakov. "At once? Together?"

He searched the amiable face in

front of him. The man had sleepy-

looking eyes of an indeterminate

aquatic color, and there was a fan

of creases, indicating either jovial-

ity or sun, raying from their

corners. There was a round button

of a nose, a surprisingly well-

modeled mouth and a fleshy chin.

Bob was answering his ques-

tion. "
